DANSK JUNIOR GOLF AKADEMI

DJGA in USA january 2009

Danish Junior Golf Academy visited PGA Learning center at Port St. Lucie for a two week practice camp, and we would like to thank you for a unique experience.

The practice facilities are fantastic and the level of your service provided a very satisfying stay for us, and made it possible to focus solely on improving the skills of the young young junior golfers. We were especially pleased with the practice holes at the back of the range, where it is possible to practice more gamelike than possible on the driving range in all areas of the approach game.

DJGA warm up

We had a great time during the evenings on the range in the cooler temperatures to make our practice as purposeful as possible.

Furthermore we appreciated our reserved area at the driving range, where we could do our body-dynamics work with Rob Neal during our stay.

Rob Neal with the biodynamics system

Mike Petterson taught us about club fitting and fitted players for us on the amazing MAT system – thanks, Mike.

We hope to return to your setting next year – it is definitely worth the trip for anyone who wishes to improve their game. We could not have spent a holiday better than at the PGA Learning center.
