

# Golf BioDynamics Cetification - Level I - for Golf Professionals

## Using the Latest Technology in your Golf Coaching?

Delve deeper into the theory and get practical hands on experience using 3D, Trackman and High Speed Video techniques

Learn about Physical Screening Tests you can perform on the Range (The Big Ten)

How to build your brand in the golf industry today

Our goal is to promote an interactive learning environment and to be able to provide the applicants with hands-on experience using the latest technology in coaching. The class size will be limited to 12 people.

A multi-disciplinary approach to improved technical performance in the golf swing will be emphasised, with exposure to "On-Range" physical screening tests and the linking of the technical information to the physical status of the golfer. A short business module is being offered that focuses on small business development, including brand recognition.

Participants will be involved in lectures, practical sessions and demonstrations of the latest concepts that underpin the acceleration of technique improvement for all levels of golfers. There will also be examinations, assignment work and practical hours to be completed during and outside the programme schedule prior to the GBD Level I Certification being awarded.

Members interested in attending can contact [R.Neal@golfbiodynamics.com](mailto:R.Neal@golfbiodynamics.com) for further information. Details of the Course Outline and speakers are available upon inquiry.

**Cost:**  
\$ 1,995.00  
*(Deposit + No interest payment plan available)*

## The Golf Athlete - Level I and II Courses

### BECOME A Leading Golf Practitioner

World class speakers Dr. Robert Neal (Golf Biomechanist) and Michael Dalgleish (Physiotherapist/Exercise Scientist) are currently working with many tour players including PGA winner Keegan Bradley, John Senden, Jason Day and Rory McIlroy.

#### Level One:

Investigate the link between the physical and the technical in the golf swing; How to use 3D Motion Measurement & physically assess a golfer to get better results; Examine the principles of Long Term Athletic Development and the complexity behind recommending exercise interventions.

#### Level Two:

Integrated 3D Biomechanics, physiotherapy and strength & conditioning for common player swing faults; Case Studies and practical application - Identify measure, physically assess & prescribe specific exercise curriculum for the major swing faults

#### Registration

Gold Coast – Michael Dalgleish - Tel: 0438 678 467 Email: [michael@thegolfathlete.com](mailto:michael@thegolfathlete.com)
